

Type 22 Fabric Expansion Joint

Standard model tubular fabric expansion joint composed of single- or multi-layer fabric with preformed convolution, available in cylindrical or rectangular shape for mounting on angled flanges up the pipeline.

Designed for high temperatures this fabric expansion joint is normally used with an internal baffle plate (sleeve) and an insulation pillow. Insulation can be incorporated in the fabric on request.

For detailed technical specifications on Type 22 fabric expansion joints please check the following table and documents or [contact us](#).

Features

- ✓ compensate large movements and vibrations
- ✓ installment on extended angle flange
- ✓ high temperature design
- ✓ preformed convolution
- ✓ optional insulation and baffle plate

Type	Fabric
Series	W 22
Couplings	angled flanges
Size/Range	by request *
Pressure	up to 500 mbars **
Axial	up to 50% of L
Lateral	up to 20% of L
Angular	acc. to designsheet

* limited by manufacturing technology

** special constructions for higher pressure may be possible
