

Type 52 Fabric Expansion Joint

Standard model conical fabric expansion joint composed of single- or multi-layer fabric, available in cylindrical or rectangular shape for mounting with mixed couplings.

This expansion joint allows connecting non-identical cross-sections by flange and clamp couplings.

For detailed technical specifications on Type 52 fabric expansion joints please check the following table and documents or [contact us](#).

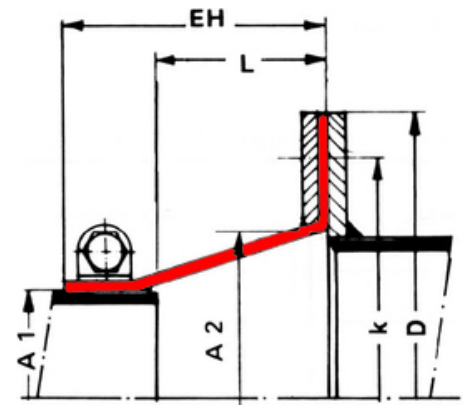

Note | Type 52 - Fabric Expansion Joint | 3D view

► Features

- ✔ compensate universal movements and vibrations
- ✔ mixed couplings installment
- ✔ different cross-sections
- ✔ minimal reactional forces

Type	Fabric
Series	W 52
Couplings	clamp/flange
Size/Range	by request *
Pressure	up to 500 mbars **
Axial	up to 50% of L
Lateral	up to 15% of L
Angular	acc. to designsheet

* limited by manufacturing technology

** special constructions for higher pressure may be possible
